

Prof. Sakamon Devahastin is with the Department of Food Engineering, Faculty of Engineering, King Mongkut's University of Technology Thonburi (KMUTT) in Bangkok, Thailand. His main research interests are in both thermal and non-thermal processing of foods and biomaterials as well as in food materials science and structural characterization, computational fluid dynamics and heat/mass transfer. He has published more than 270 papers in referred international journals (h-index of 63), given some 120 presentations at various international conferences and is an author/co-author of 19 book chapters, author/editor of 4 books and co-inventor of 5 patents. He has served as Editor of an archival journal Drying Technology and been on the editorial boards of various other journals in food science and engineering. He is Fellow of the Royal Society of Thailand and Fellow of the International Academy of Drying Science & Technology. Prof. Devahastin received his PhD in chemical engineering from McGill University, Canada in 2001.
